

SMOKE TESTING NOTICE

(Pase A La Ortra Pagina)

Leucadia Wastewater District (LWD) will be conducting smoke tests beginning: _____ within your neighborhood. This is part of an ongoing program to detect failures and leaks within the sewer collection system.

Under normal circumstances, the smoke that will be generated to conduct these tests should not enter your home as long as the plumbing is working properly. **You will see smoke coming from the vents of the roof of your home. That is a normal occurrence when conducting these tests.** In most cases, entrance of smoke into a dwelling is through fixtures that are not routinely used. Therefore, we request that you run water for a minute or two at all your fixtures to ensure that all traps are full of water.

If smoke does enter your home, you should report it immediately to the crews conducting the tests in your neighborhood. They will do a quick inspection of your residence to locate the problem area in your plumbing. Opening of doors and windows should quickly dissipate any smoke

The smoke that is being used is manufactured specifically for this application and is non-toxic and non-staining. Please accept our apologies for any inconvenience this may cause and our thanks for your patience and cooperation. If you should have any questions regarding these tests, please feel free to contact the Leucadia Wastewater District at (760) 753-0155.
