

**RESOLUTION NO. 2437**

**A RESOLUTION OF THE BOARD OF DIRECTORS OF THE  
LEUCADIA WASTEWATER DISTRICT  
ADOPTING A REVISED RESERVE FUND POLICY**

---

WHEREAS, the Leucadia Wastewater District (LWD) Board of Directors has adopted a Reserve Fund Policy; and

WHEREAS, the LWD Board of Directors conduct an annual review of the Policy and recommend modifications to the Policy as required;

NOW, THEREFORE, it is hereby resolved as follows:

1. The LWD Board of Directors adopts the LWD Reserve Fund Policy attached hereto as Attachment "1" and directs that it be implemented consistent with all applicable laws and related District policies.
2. This Resolution supersedes Resolution No. 2410.

PASSED AND ADOPTED by the Board of Directors of Leucadia Wastewater District this 11th day of February, 2026, by the following vote:

AYES: Brown, Pacilio, Sullivan, Saldana

NOES: None.

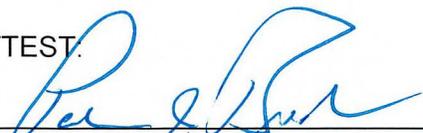

ABSENT: Roesink

ABSTAIN: None.

Matthew Brown, President

ATTEST.

Paul J. Bushee, General Manager

(SEAL)

### LEUCADIA WASTEWATER DISTRICT RESERVE FUND POLICY

Ref: 26-9345

#### A. POLICY STATEMENT:

One key element of prudent financial planning is to ensure that sufficient funding is available for current operating, capital, and debt service cost needs. An additional critical element of fiscal responsibility is to anticipate and prepare for future funding requirements as well as for unforeseen disasters and other unforeseen events. The Leucadia Wastewater District (LWD) will at all times strive to have sufficient funding available to meet its operating, capital, and debt service cost obligations. Reserve funds will be accumulated and maintained in a manner, which allows LWD to fund costs consistent with LWD's adopted Asset Management Plan and Financial Plan, while avoiding significant rate fluctuations due to changes in cash flow requirements. LWD will also maintain an emergency reserve position that may be utilized to fund unexpected disasters or unanticipated major failures. The Board of Directors will annually review the level of reserve funds maintained.

#### B. DEFINITIONS:

Restricted Reserves: These reserves have restrictions on their use that are imposed by outside sources such as creditors, grantors, contributors, or laws or regulations of other governments.

Unrestricted Reserves: These reserves have no externally imposed use restriction. The use of Unrestricted Reserve funds is at the discretion of the Board of Directors. There are two categories of Unrestricted Reserves: Designated and Undesignated. At LWD, all Unrestricted Reserves have been Designated.

Designated Reserves: These reserves are set-aside for a specific purpose, which is determined by the Board of Directors. The Board of Directors also has the authority to redirect the use of these reserve funds as the needs of LWD change.

#### C. LEUCADIA WASTEWATER DISTRICT RESERVES:

LWD maintains the following reserve funds:

##### 1.0 RESTRICTED RESERVES:

###### a) Encina Wastewater Authority Reserve:

LWD is a member agency of the Encina Wastewater Authority Joint Powers Authority (EWA). EWA may maintain member agency deposits on hand for emergencies and unanticipated expenditures.

###### b) OPEB/Pension Asset Reserve:

LWD contributes funds to the CalPERS Public Employees' Retirement Fund (PERF) which can only be used to pay for LWD employees' pension expense.

LWD contributes funds to the CalPERS California Employers' Retiree Benefit Trust (CERBT) Fund which can only be used to pay for LWD's portion of retirees' medical costs (also called Other Post-Employment Benefit (OPEB)).

## 2.0 UNRESTRICTED DESIGNATED RESERVES:

a) Wastewater Operating Reserve:

Since the majority of operating revenues are received periodically over the fiscal year and operating expenses are incurred uniformly over the fiscal year, an operating reserve is necessary to fund those costs attributable to daily operations. To meet daily operational needs, LWD has established a Wastewater Operating Reserve balance at 33% of annual budgeted operating expenses.

b) Wastewater Replacement Reserve:

The Wastewater Replacement Reserve provides funds for capital replacement and refurbishment of existing wastewater facilities. These capital improvements are identified in LWD's adopted Asset Management Plan and Financial Plan. Wastewater Replacement Reserve funds accumulate in an orderly manner and are drawn down as required to fund capital replacement projects. To avoid abrupt sewer service rate changes, this reserve may be used to stabilize rates. The Wastewater Replacement Reserve shall target a value of two years of the 5-year average of capital replacement costs for wastewater facilities as identified in the Financial Plan. The minimum target shall be one year of the 5-year average of capital replacement costs to ensure that LWD is able to fund capital replacements as they are scheduled or needed.

c) Recycled Water Reserve:

The Recycled Water Reserve will fund capital improvements and replacement of water recycling facilities. This reserve can also be used to fund operating expenses in the Recycled Water Fund whenever there is a shortfall of recycled wastewater sales revenue. These capital improvements are identified in LWD's adopted Asset Management Plan and Financial Plan. The Recycled Water Reserve shall not exceed the total 20-year capital replacement costs for water recycling facilities as identified in the Financial Plan.

d) Wastewater Emergency Reserve:

The Wastewater Emergency Reserve provides funds for emergency response for potential repair or replacement of capital facilities due to damage from a natural disaster or unanticipated major failure in a period when capital improvements funds have otherwise been purposely spent down to preset limits on planned projects. The Wastewater Emergency Reserve is at the discretion of the Board of Directors and is maintained at a level of \$7,500,000, which is based on the recommendation by LWD staff and the District Engineer (Exhibit A).

For further detail of the sources and uses of the above reserves, please refer to following section "D".

### D. SOURCES AND USE OF FUNDS:

This section describes the sources and uses of funds for LWD reserves and includes maximum and minimum reserve balances and other informational notes.

## RESTRICTED RESERVES

RESERVE	SOURCE OF FUNDS	USE OF FUNDS	NOTES
EWA	Funds transferred from LWD to EWA for deposit with EWA	Capital investment and operating expenditures made by EWA	Deposit balances determined by EWA Board of Directors .
OPEB/Pension Asset	Funds transferred from LWD to the CERBT Fund or PERF, and associated investment earnings	OPEB or pension related expenses	Funds are held in the CERBT Fund or PERF by CalPERS

## UNRESTRICTED DESIGNATED RESERVES

RESERVE	SOURCE OF FUNDS	USE OF FUNDS	NOTES
Wastewater Operating	Operating income and interest earned on reserve	Wastewater operating expenses and transfers to other reserves	Reserve balance maintained at 33% of budgeted operating expenses. Excess (deficit) funds transferred to (from) Replacement Reserve.
Wastewater Replacement	Property taxes, interest earned on reserve, capacity fees, and other non-operating income. Also excess operating net income transferred from the Wastewater Operating Reserve, and excess interest earned on the Emergency Reserve	Replacement related capital expenditures and rate stabilization	Reserve target is two years of the 5-year average of capital replacement costs for wastewater facilities as identified in the Financial Plan. Minimum reserve target balance is one year of the 5-year average of the capital replacement costs.
Recycled Water	Recycled water sales, grant income, and interest earned on reserve	Recycled water capital improvement and replacement costs as well as water recycling operating expenses	Maximum reserve balance is 20-year capital replacement costs as identified in the Financial Plan.
Wastewater Emergency	Originally funded by board action. Interest earned on reserve. Additional funding as needed to maintain Reserve level.	Emergency repair or replacement expenditures	Reserve balance maintained at \$7,500,000 level. Excess (deficit) funds transferred to (from) Replacement Reserve.

## EXHIBIT A

### Leucadia Wastewater District Discussion of Emergency Reserve Fund

Maintaining a Wastewater Emergency Reserve Fund (WERF) provides the benefit of having funds available for emergency response to repair and/or replace capital facilities due to natural disaster damage or unanticipated major failure in a period when capital improvement funds have otherwise been purposely spent down to preset limits on planned projects. Separately, Capital Reserve Funds will be accumulated in a planned manner through financing, setting aside a portion of sewer service fees, or a combination of both methods, as determined by Board policy.

The amount to be recommended for maintenance in the WERF has been evaluated and discussed by Leucadia Wastewater District (LWD) staff and the District Engineer. The following table lists some pros and cons for three potential levels of WERF.

<b>Alternatives</b>	<b>Pros</b>	<b>Cons</b>
Alternative 1: LWD maintain small WERF of \$1.0 million	<ol style="list-style-type: none"><li>1) Reduces initial reliance on borrowing.</li><li>2) Would extend period of reduced rate increases.</li></ol>	<ol style="list-style-type: none"><li>1) Not enough reserve to respond to many reasonably possible emergency events.</li><li>2) Increased risk at point of WERF exhaustion that emergencies could not be responded to timely.</li><li>3) Reduced LWD liquidity and lesser financing qualifications.</li><li>4) Increased long term reliance on borrowing.</li></ol>
Alternative 2: LWD maintain a Moderate WERF of \$7.5 million	<ol style="list-style-type: none"><li>1) Sufficient funds to adequately replace or repair two major LWD facilities on an emergency basis.</li><li>2) Sufficient funds to replace or repair about six or seven concurrent intermediate size facility problems at any given time.</li><li>3) Unlikely to deplete WERF in a time period that would not allow establishment of additional financing, if necessary.</li><li>4) Provides opportunity for investment of modest amount of about 1.5 years worth of sewer service fee collections.</li></ol>	<ol style="list-style-type: none"><li>1) Ties up \$7.5 million of funds that could be used to offset or defer rate increases.</li><li>2) May be considered as ability to pay discretionary fines in the potential event of a major wastewater spill.</li><li>3) Over time, it may be determined that the \$7.5 million amount should be decreased or increased depending on facility performance and risk tolerance.</li></ol>

	<p>5) Provides ability to fund one to two years of typical CIP schedule projects, while additional funding is being established.</p> <p>6) Increases liquidity of LWD that would be considered positively by financial markets when considering other financing issues.</p>	
<p>Alternative 3: LWD maintain a Large WERF of \$15 million</p>	<p>1) Very little risk that any emergency situation would result that funds were not available for immediate response.</p>	<p>1) Maintenance of large reserves is considered by some watch dog entities as a negative attribute.</p>

Based on an analysis of the above three WERF funding alternatives above, LWD staff and the District Engineer recommend that LWD adopt Alternative 2 – LWD Maintain a Moderate WERF of \$7.5 million.
